COMPLAINT SOURCE:	Email	**SEVERITY / PRIORITY:**	**Major / High**
WAREHOUSE LOCATION:	WH-Central East, Bay 14	**COUNTRY OF ORIGIN:**	United States (USA)

1. CUSTOMER & REPORTING PARTY DETAILS

Customer Name:	St. Jude Hospital	**Customer Contact:**	Dr. Sarah Williams
Email Address:	sarah.williams@stjudehospital.org	**Phone Number:**	+1-312-555-1942
Distributor Name:	Apex MedSupply Distribution Ltd.	**Purchase Order No:**	PO-994821-STJ

2. PRODUCT IDENTIFICATION & BATCH METADATA

PRODUCT DESCRIPTION	STRENGTH	DOSAGE FORM	BATCH NO	MFG DATE	EXP DATE	QTY AFFECTED
Amoxicillin Trihydrate Capsules	500 mg	Capsule	**BAT-2026-8891**	2025-11-10	2027-11-10	**50 Capsules**

Manufacturing Site:	PharmaSynth Plant 4, New Jersey, USA	**Invoice Number:**	INV-2026-77409
Shipping Date:	2026-07-12	**Delivery Date:**	2026-07-15

3. COMPLAINT DESCRIPTION & OBSERVATIONS (PART 1)

On July 20, 2026, the inpatient pharmacy department at St. Jude Hospital received a direct commercial shipment containing Amoxicillin Trihydrate Capsules (500 mg, Capsule dosage form) under Purchase Order PO-994821-STJ and Invoice INV-2026-77409. During initial receiving verification and routine quality inspection conducted by senior pharmacy staff, severe physical defect anomalies were observed in multiple blister cards originating from Batch BAT-2026-8891 (Manufacturing Date: 2025-11-10, Expiry Date: 2027-11-10).

Specifically, hospital pharmacists identified that several aluminum foil blister cavity seals were compromised and physically ruptured prior to package opening. A total quantity of 50 Capsules across 5 distinct blister cards exhibited broken, peeling, or micro-punctured foil seals, resulting in direct atmospheric exposure of the active oral antibiotic product. Due to high ambient summer humidity during regional transit from distributor Apex MedSupply Distribution Ltd., exposed capsules displayed initial signs of hygroscopic softening, swelling, discoloration, and potential loss of chemical potency.

Hospital staff immediately isolated and quarantined the entire affected lot (50 Capsules) into climate-controlled storage located at Warehouse Location: WH-Central East, Bay 14. Pharmacy leadership confirms that zero patients received or ingested damaged medication from this compromised lot. St. Jude Hospital requests an expedited investigation into primary packaging heat-seal integrity at manufacturing site PharmaSynth Plant 4 and immediate replacement stock delivery.

4. COMPLAINT NARRATIVE (CONTINUED) & INVESTIGATION REQUEST

Upon discovering the Packaging Defect on Complaint Date 2026-07-20, Dr. Sarah Williams immediately instituted formal quarantine protocols in accordance with hospital standard operating procedures and cGMP regulations. The affected inventory of Amoxicillin Trihydrate Capsules 500 mg was registered in the hospital pharmacovigilance log under Internal Complaint Number CMP-2026-0891-QA.

Given that Amoxicillin Trihydrate is a broad-spectrum antibiotic indicated for acute bacterial infections, compromised primary packaging poses a Major severity classification and High priority rating due to potential loss of potency, altered dissolution profile, or microbial contamination. Hospital administration expects full cooperation from the manufacturing facility (PharmaSynth Plant 4) and distributor (Apex MedSupply Distribution Ltd.) to complete a formal Root Cause Analysis (RCA) and issue corrective actions within 15 business days.

5. STORAGE CONDITIONS & PHYSICAL OBSERVATIONS

Controlled Environment Parameters:

- Temperature Controlled: Maintained strictly between 20°C to 25°C (68°F to 77°F) with calibrated digital data loggers.
- Relative Humidity: Maintained below 60% RH in accordance with USP <659> packaging and storage requirements.
- Quarantine Isolation: Secured under lock in Warehouse Location: WH-Central East, Bay 14 awaiting QA disposition.
- Physical Integrity Defect: Micro-fractures and delamination along heat-seal border of aluminum blister cavity.

6. REQUESTED CORRECTIVE ACTION & CUSTOMER EXPECTATIONS

- Immediate Replacement Stock: Expedite replacement shipment of 50 Capsules (Amoxicillin Trihydrate 500 mg) from an uncompromised batch.
- CAPA Investigation Report: Provide formal Root Cause Analysis detailing sealing temperature logs at PharmaSynth Plant 4.
- Financial Adjustment: Issue credit memo against Invoice INV-2026-77409 for the quarantined 50 Capsules.
- Logistics Handling Audit: Review transit vibration stress with carrier Apex MedSupply Distribution Ltd. (PO-994821-STJ).

7. AUTHORIZED SIGNATURE BLOCK

REPORTING CUSTOMER AUTHORIZATION:
Dr. Sarah Williams
